The document will present reflexions for the future State aid policy and will ask for comments from all interested parties. In light of these comments, the Commission will modify the existing rules. These modifications will take place between 2005 and 2008.	Non-legislative action / Other
Proposition d'un règlement du conseil révoquant le Règlement 4056/86	Proposal to repeal the currently applicable provisions of Council Regulation 4056/86, applying the EC competition rules to the maritime transport sector	Legislative Proposal / Regulation
Livre vert sur les demandes de dommages et intérêts pour les violations du droit européen de concurrence (Articles 81 et 82 du Traité).	Private enforcement of the EU competition rules is lagging far behind public enforcement. The lack of a clear set of rules for claims of damages in the EU Member States has as a consequence that there is presently virtually no successful private litigation for damages resulting from infringements of the EU competition rules.	Non-legislative action / Green Paper

	The Green Paper will be used as the springboard for launching a general policy review and to consult stakeholders, a prerequisite to the launching of any formal proposal in this area. Any formal proposal would have as its main objective a higher level of compliance with the EU competition rules.	
Communication on the strengthening of economic governance	This communication will provide elements to strengthen the EU framework in order to 1) better combine discipline with economic growth considerations 2) focus more on the sustainability of the member State's public finances, 3) improve implementation.	Non-legislative action / Commission Communication
Proposition de modification du règlement 1467/97 et/ou 1466/97 sur le Pacte de Stabilité et de Croissance	In its June 2004 Communication and its September 2004 Communication, the Commission considered several elements for strengthening the SGP: (i) placing more focus on debt and sustainability in the surveillance of budgetary positions; (ii) allowing for more country-specific circumstances in defining the medium-term objectives of “close to balance or in surplus”; (iii) considering economic circumstances and developments in the implementation of the Excessive Deficit Procedure; (iv) ensuring earlier actions to correct inadequate budgetary developments. The exercise of revisiting the SGP is meant to adjust the existing framework, strengthening and clarifying it following the adoption of a new Communication on the strengthening of economic governance (2005/ECFIN/21).	Legislative Proposal
Proposition de Règlement du Parlement européen et du Conseil établissant des procédures pour l'autorisation, la supervision et la vigilance concernant les produits d'ingénierie tissulaires humains. Objective is to ensure the free movement of these products, while guaranteeing a high level of safety for patients and medical practitioners	Legislative Proposal / Regulation

Non-legislative action / Commission Communication
Communication on i2010 (European Information Society 2010)	The eEurope initiative has made a major contribution to advancing the information society in Europe. This initiative runs to the end of 2005, and there is a need now to plan follow-on activities. The form and content of a future eEurope initiative requires extensive discussion over the coming months in the context of the mid-term review of the Lisbon strategy and on the basis of consultations with a wide range of stakeholders. This Communication will reflect the results of these consultations.	Non-legislative action / Commission Communication
Proposition de Directive sur les Services de Paiement dans le Marché Intérieur	Today the legal framework is fragmented and mostly based on national rules. This Legal Framework for Payments is necessary in order to complement the initiatives launched by industry (e.g. European Payment Council) on the payments infrastructures. It will guarantee an adequate level of customer protection, and ensure legal certainty for all parties. It will provide a passport to payment institutions. It is part of the simplification exercise since it will repeal previous EU texts (Directive 97/5/EC and Recommendation 97/489/EC) and harmonise in a codified way core pieces of legislation on payments in the Internal Market.	Legislative Proposal / Directive

Proposition de directive du Parlement européen et du Conseil modifiant les directives 89/665/CEE et 92/13/CEE portant coordination des dispositions législatives, réglementaires et administratives relatives à l'application des procédures de recours en matière de passation des marchés publics	L'objectif est d'encourager davantage les entreprises communautaires à soumissionner dans n'importe quel Etat membre de l'Union, en leur donnant la certitude qu'elles pourront, si nécessaire, engager des recours efficaces dans le cas où leurs intérêts auraient été lésés lors de procédures de passation de marchés de travaux, de fournitures ou de services. Proposition de Décision du Conseil instituant un panel en charge des recours contre de décisions de l'OHMI auprès du Tribunal de Première Instance	According to Article 225A of the Treaty, judicial panels may be created to hear and determine at first instance certain classes of action or proceeding brought in specific areas. The appeals lodged against decisions of the Boards of Appeal of the Office for Harmonization in the Internal Market (Trade Marks and Designs) represent almost 30% of the cases to be dealt with by the Court of First Instance. The consequence of this is the congestion of the Court of First Instance, which entails that proceedings are slowed down.	Legislative Proposal / Decision
Proposition de directive concernant la gestion collective des droits d'auteur et droits voisins dans le marché intérieur	The proposal will focus on the management of collecting societies in order to set up a level playing field which will enhance the trust into collecting societies from rightholders and commercial users. Rightholders should therefore see their rights protected in a better way and commercial users should be granted licenses on a more transparent basis, within the Internal Market. The purpose is not to harmonise all the rules governing collecting societies but to impose obligations necessary to the smooth functioning of the Internal Market without prejudging the legal mechanisms to be used by Member States in order to implement them. A Directive seems the most appropriate way to reach that target.	Legislative Proposal / Directive

Communication/Recommendation de la Commission concernant l'application expérimentale de la "taxation au pays de résidence" pour les petites et moyennes entreprises dans l'Union européenne	<p>The concept of "Home State Taxation" provides in simple terms that the profits of a group of companies active in more than one Member State should be computed according to the rules of one company tax system only, the system of the Home State of the parent company of the group. Each participating Member State would continue, however, to tax at its own corporate tax rate its share of the profits of the group's business activities in that State.</p> <p>This approach addresses precisely the tax issues which hamper SMEs most in their cross-border activities: disproportionately high tax compliance costs resulting from the administrative tax formalities, bookkeeping requirements etc.; current difficulties with the cross-border offsetting of losses.</p>	Non-legislative action / Commission Communication

La Communication inclura les dispositions modales correspondant aux initiatives rendues nécessaires à court terme. Les études d'impact seront à prévoir seulement pour les textes législatifs qui accompagneront la communication de la Commission.	Non-legislative action / Other

<p>Proposition concernant la structure de gestion du projet industriel SESAME (entreprise commune) pour la réalisation technique du Ciel unique.</p>	<p>The Single European Sky legislation seeks to consolidate air traffic service provision to be more efficient at the European level and to accelerate the development and implementation of the future European ATM system. The programme (SESAME – Single European Sky Implementation Programme) to develop the future system will require significant involvement at the European level and is currently estimated in the region of 200M€/year from 2007 to 2017 and subsequent implementation investments could amount to 5bn€.
